## How To Use This Index

There are two slightly different referencing styles used in this index because we changed our referencing system half way through the six month period covered. Each reference to a clipping from the first three months of 1971 consists of: 1) a letter prefix, and 2) a number. The letter indicates the month (J=January, F=February, M=March). The number following the letter is the indexing number of the clipping (it corresponds to the number that appears in the upper right hand corner of each clipping reference box). References to clips from April to June are by indexing number only (from the end of February on, the index numbering for a given month begins where the previous month ended).

The following table indicates the numbering system covering each month's clips:

January	J 1-524	April	962-1497
February	F 1-410	May	1498-1954
March	M 411-961	June	1955-2505

An underlined reference number indicates an illustration is included in the article.

This index is divided into four parts: 1) Country, 2) International Organization, 3) Personal Name, and 4) Byline.

Country Index: Under each country heading are a series of subheads in alphabetical order. The following subheads are standard throughout the index:

- Ambassadors
- Armed Forces: Under armed forces are listed by name the branches of the country's military and police.
- Banks and Finance Corporations: Under this subhead are listed by name the finance corporations (domestic public and private, and foreign private) operating in the country.
